S-FLUE

Twist Lock Twin Wall
Flue System

A Sphering Company

SFLUE® is a stainless steel insulated twin wall chimney system designed and manufactured in the U.K. Suitable for domestic & commercial installations for a range of fuel types. Available in Satin black and high polished stainless steel finish. It's high thermal efficiency assists appliance performance and an easy twist lock jointing method makes it popular with installers.

SFLUE® is a prefabricated, factory made twin-wall insulated stainless steel system chimney and comes with an extensive range of components, specifically designed to meet the requirements for multi-functional applications serving a variety of fuels for domestic stove installations.

The fully welded construction, combined with a high performance insulating medium, provides the optimum level of performance for DEFRA approved and the latest EcoDesign and 'Blue Skies Certified' high efficiency stoves, in addition to both modern and traditional appliances.

The unique 8 barb twist-lock jointing system offers the ultimate ease of installation, quality and functionality. The components are secured by engaging the barbs with a firm twist of each section, and then finished with a locking band.

All SFLUE components are also available in a RAL 9004 Satin Signal Black finish.

All SFLUE components are fully compatible with the SFL SVIT range of vitreous enamelled connecting flue pipes and the SELFLEX / TUBEX PLUS range of flexible liners.

Typical Applications

- Wood-burning Stoves
- Multi-Fuel Stoves
- Non-Condensing Gas & Oil Appliance

CA

CE

Table A

SFLUE® Commerical Product Designations to BS EN 1856-1							
Product Description	Standard Number	Temperature Class	Pressure Class	D = Dry W = Wet	Corrosion Class	Material Specification Liner Grade 316L Liner Thickness 0.5	Sootfire Resistance G= Yes 0= No
2797-CPR-496040	BS EN 1856-1	T450	NI	D	Vm	L50040	G50

Approvals

SFLUE is CE and UKCA certified to BS EN 1856-1, certificate No. 2797-CPR-496040 and 0086-CPR-740592 respectively to the performance designations as detailed in Table A.

Quality

All components are manufactured under a quality assurance scheme, certificate No. FM557622, administered by British Standards in accordance with BS EN 9001:2015. In addition, SFL operate a CE approved factory production control system as required under the Construction Products Regulation.

Construction

SFLUE is manufactured from a high grade 316L stainless steel liner and a 304 outer case. The unique joint design allows the inner liner to freely expand and contract throughout the system as the flue gas temperature varies, eliminating the need for additional expansion components.

Jointing

The joint is made by fitting the female end over the male end and engaging the joint system by rotating the component clockwise. A Locking Band is then fitted to finalise the joint. The SFLUE joint incorporates an eight barb twist lock coupler system to allow easy and rapid installation of the product. When used with the Sflue support components, the joint will support up to 1.5 metres free standing above the last support.

Warranty

SFLUE® is backed up with a comprehensive 20-year product warranty. The 20 Year Warranty is a measure of our confidence in the quality and reliability of our flue systems and gives added peace of mind for any installation.

Partner with us, succeed together.

Need assistance with your residential or commercial flue project? Our team of experienced experts is here to help at every stage. We offer product selection and design assistance, conduct system surveys, and work with key installation partners to provide bespoke turnkey packages tailored to your needs.

Alle Bauteile auch in 178 mm und 203 mm Innendurchmesser lieferbar!

Adaptors & Starter Components

For satin black coated finish, add 'B' to the end of the part number, e.g. 2140605B.

SFLUE

EasyFit Starter Length

Used for direct connection to the appliance. Incorporates an adjustable inner and outer lower section to allow for easy disconnection of the chimney from the appliance while offering a very aesthetic connection. Available in both Short and Long versions.

Short

ø	A(mm)	B(OD)	Code (S)
127mm	696-787	123	2140605
152mm	696-787	148	2140606

Long

Adaptor to Cast Iron

A crimped, reduced inner section to adapt a cast iron stove outlet directly to twin wall. Features an outer sleeve.

ø	A(mm)	O.D.	Code
127mm	103	114	2119505
152mm	103	139	2119506

Short Tapered Adaptor

Offers an aesthetic transition from the single wall connecting flue pipe to an SFLUE chimney system.

ø	A(mm)	B(OD)	Code
127mm	150	125	2140505
152mm	150	150	2140506

This component MUST only be fitted to the stove pipe and not directly to the appliance.

SVIT Tapered Adaptor

Allow connection to the SVIT enameled connecting flue pipe

ø	A	Code
127mm	125mm	2141605
152mm	150mm	2141606

SVIT Tapered Increasing Adaptor

Increases the diameter of the SVIT product to the next size of twin wall.

ø	A	Code
127mm	100	2173605
152mm	125	2173606

SFLUE to Flex Adaptor

Used to connect SFLUE to a generic flexible flue liner.

ø	A(mm)	B(mm)	Code
127mm	140	125	2150105
152mm	167	145	2150106

Flex to SFLUE Adaptor

Used to connect from a generic flexible flue liner to SFLUE.

ø	A(mm)	B(mm)	Code
127mm	140	125	2150205
152mm	167	145	2150206

Twin Wall To Selflex Adaptor

Used to connect from twin wall to SFL Selflex chimney liner.

ø	A(mm)	Code
127mm	57	0593212
152mm	57	0593215

Alle Bauteile auch in 178 mm und 203 mm Innendurchmesser lieferbar!

Adaptors & Starter Components

Selfflex To Twin Wall Adaptor
Used to connect from SFL Selfflex chimney liner to twin wall.

ø	A(mm)	Code
127mm	65	0593512
152mm	65	0593515

Increasesers

SFLUE Increaser (CPC)
An increaser to facilitate an increase in diameter size between SFLUE components.

ø	Flue size A(mm)	Code

152mm	2141206

Long (500mm - 850mm)

ø	Code
127mm	2141405
152mm	2141406

Adjustable Slip Section

Designed to fit over any standard length and offers a degree of flexibility when standard dimensions are not suitable. Supplied with separate insulation and a clamp band. Only to be used to extend standard lengths.

ø	Min(mm)	Max(mm)	Code
127mm	30	256	2143005
152mm	30	244	2143006

The adjustable components above are not load bearing, always use a support component directly above when vertically applied.

Alle Bauteile auch in 178 mm und 203 mm Innendurchmesser lieferbar!

Lengths

Inspection Length

A 500mm length incorporating both an internal and external door to allow for inspection and sweeping of the system.

ø	A(mm)	Code
127mm	500	2141805
152mm	500	2141806

Elbows & Tees

Two Segment Elbows

15° / 30° / 45°

Provides a change of direction, measured from the vertical by the specified angle. Elbows are supplied with an un-barbed female coupler (to allow for 360° rotations) and bolted locking band for rigid joint bracing, especially when used as an offset around gutters and fascia boards. Detailed elbow offset dimensions are located on page 15.

Elbow Angle	Code	
	ø127	ø152
15°	2131405	2131406
30°	2132305	2132306
45°	2132205	2132206

Three Segment 90° Elbow

Provides a 90° change of direction.

ø	Code
127mm	2145305
152mm	2145306

For dimensions, see page 15.

90° Equal Tee

Used at the base of a vertical chimney from a horizontal stove outlet, or as an inspection opening.

ø	A (mm)	B (mm)	C (mm)	Code
127mm	305	152	152	2114305
152mm	325	162	162	2114306

SFLUE

135° Tee

Used at the base of a vertical chimney, or to allow a smooth transition from the horizontal to vertical plain when used with a 45° elbow. The coupler on the branch is unbarbed to allow unlimited rotational adjustment and includes a bolted locking band. For dimensions, see page 15.

ø	Code
127mm	2141305
152mm	2141306

Tee Cap with Drain

Used at the bottom of a vertical chimney to facilitate drainage. Fitted with a stainless steel 1" BSP external thread drain connection.

ø	Code
127mm	2153205
152mm	2153206

Tee Cap

Used to close off the branch or base of a tee, or for use as an access/inspection component.

ø	Code
127mm	2119105
152mm	2119106

Alle Bauteile auch in 178 mm und 203 mm Innendurchmesser lieferbar!

Support Components

SFLUE

EasyFit Wall Band

Can be used to add additional lateral support when the chimney has already been installed. Where used on its own, it must be positioned at intervals not exceeding 3.0 metres.

ø	Code
127mm	3109605
152mm	3109606

Wall Band

Wall bands provide lateral support for the chimney and must be used at intervals not exceeding 3.0 metres beyond any load bearing support. Available in both stainless steel and galvanised steel.

ø	A(mm)	SS	Galv
127mm	137	3115155	3116155
152mm	162	3115205	3116205

Wall Band Extension Pieces

Where externally applied, the intervals between Wall Band fixing centres must be reduced from 3.0 metres to 2.5 metres. The maximum clearance is as detailed below. Available in both stainless steel and galvanised steel.

ø	Min	Max	SS	Galv
All	50	100	3119136	3120136

Heavy Duty Wall Band

Can also be used as a conventional wall band. Manufactured in stainless steel

152mm	302	331	285	2151806

Roof Bracing Kit

A Roof Bracing Kit can be used whenever there is a need to stabilise the chimney above the roof level. The roof bracing kit is especially recommended when the chimney is offset at roof level prior to terminating above the roof. The arms can be adjusted, offering a range from 1.65 metres to 2.5 metres in height. Manufactured in galvanised steel.

Ø	Code
127mm	7073312
152mm	7073315

Roof/Rafter Support

Designed to allow a chimney to be supported on roof joists, trussed rafters etc. Supplied with a diameter specific rotational clamp band. Maximum suspended chimney length supported is 9 metres when supported on a truss or 6 metres when supported below the truss. Suits up to 600mm rafter span.

Ø	A(mm)	B(mm)	Code
127mm	617	206	7072612
152mm	643	232	7072615

Universal Roof/Rafter Support

As the Roof/Rafter Support above, but with a gimbal plate that is universal across all diameters. The gimbal plate is adjusted on site to match the outside diameter of the chimney. Suits up to 600mm rafter span.

Ø	A(mm)	B(mm)	Code
All	220	203	7002900

Bracing Bracket

A clamping collar for the attachment of struts/supports.

Ø	Code
127mm	2109205
152mm	2109206

Single Wall to Twin Wall Anchor Plate

Designed to be used when connecting twin wall to a lintel or pre-cast chamber. A short section of liner projects a nominal 150mm through the bottom of the plate. This component could also be used to connect a flexible chimney liner to twin wall on a capped chimney within the attic space. **Maximum Vertical Loading: 13m.**

Ø	Dimensions (mm)			Code
	A	B	C	
127mm	123	400	350	2152705
152mm	148	400	350	2152706

Selflex to Twin Wall Anchor Plate (Screwed)

Use to make the transition between SFL Selflex chimney liner and twin wall. Designed to be fixed on to the top of a lowered chimney stack, allowing the twin wall system to pass through the attic roof to termination.

Ø	Code
127mm	0593612
152mm	0593615

M10 Fixing Holes

Alle Bauteile auch in 178 mm und 203 mm Innendurchmesser lieferbar!

Terminals

Rain Cap

The Rain Cap offers a degree of protection from rain and is suitable for solid fuel and oil fired appliances.

ø	A(mm)	B(mm)	Code
127mm	255	155	2107405
152mm	300	155	2107406

Rain Cap with Mesh

Same as the Rain Cap, but with a mesh incorporated to protect from birds.

ø	A(mm)	B(mm)	Code
127mm	255	155	2107605
152mm	300	155	2107606

Round Top

The Round Top offers strong protection against driving rain and wind, recommended for exposed locations.

ø	A(mm)	B(mm)	Code
127mm	294	175	2107505
152mm	319	188	2107506

Top Stub

The Top Stub offers the least resistance to flue gases and is ideal for solid fuel and oil fired appliances, providing there is drainage at the base of the chimney.

ø	A(mm)	Code
127mm	228	2117305
152mm	228	2117306

Flashings

Aluminium Flashings

The SFL aluminium flashing range offers a competitive alternative to the traditional lead flashing, while still maintaining a traditional design and malleable material. All aluminium flashings should be fitted in conjunction with a storm collar. Flat flashings have a cone height of 250mm, cone height of the adjustable flashings vary depending on the angle.

Flat Flashing

For flat or nearly flat roofs.

ø	Dimensions(mm)			Code
	A	B	C	
127mm	190	280	495	70000007
152mm	210	300	495	70000009

Storm Cowl

The Storm Cowl is designed to offer maximum protection against driving rain and strong winds.

ø	A(mm)	B(mm)	Code
127mm	294	175	2148705
152mm	319	188	2148706

5° – 30° Adjustable Flashing

For low profile roofs.

	A	B	C	
127mm	190	280	495	70053007
152mm	210	300	660	70053009

Mini EuroCowl

The Mini EuroCowl is designed as an anti-downdraft cowl.

ø	A(mm)	B(mm)	Code
127mm	294	175	2107305
152mm	319	188	2107306

32° – 45° Adjustable Flashing

For high pitched roofs.

ø	Dimensions (mm)			Code
	A	B	C	
127mm	190	375	660	70324507
152mm	210	403	660	70324509

Storm Collar

Used to weather the top of the flashing.

Supplied with a tube of silicon sealant.

ø	A	Code
127mm	50	70123407
152mm	50	70123409

Flashings

EPDM Synthetic Rubber Flashings

The EPDM flashing system will effectively seal and remain pliant over a wide range of external chimney surface temperature extremes, from -30° to 115°C. The EPDM cones have been proven to withstand intermittent surface temperatures of up to 150°C.

EPDM Flashing & Base

The EPDM Flashing consists of a malleable aluminium base to which an EPDM rubber cone is sealed. The cone is easily trimmed on site to suit the external diameter of the chimney. The correct selection of the flashing is based on the roof pitch and selection information in the table below:

Ø	Flue OD (mm)	Roof Pitch	Flashing No.	Cone Index Cut Line	Base Size (mm)	Code
127mm	180	0-40°	2	E	600x600	4901020
152mm	200	0-30°	2	F	600x600	4901020
152mm	200	0-45°	3	C	764x764	4901030

Masterflash

The Masterflash is designed primarily for corrugated and heavily profiled roofs. The cone is easily trimmed on site to suit the external diameter of the chimney. A fixing kit is supplied with the flashing.

Ø	A(mm)	Code
127mm	254	4911004
152mm	280	4911005

Hearth Data Plate

Hearth Data Plate

Requirement J4) 1.56 Where a hearth, fireplace (including a flue box), flue or chimney is provided or extended (including cases where a flue is provided as part of the refurbishment work), information essential to the correct application and use of these facilities should be permanently posted in the building using the data plate.

90° Trim Collar
 This item is used to offer an aesthetic closing ring where a chimney passes through an outside wall. Manufactured from polished stainless steel.

ø	A(mm)	B(mm)	Code
127mm	108	394	2108505
152mm	103	409	2108506

Angled Wall Cover Ring (2-Piece)
 Designed to offer an aesthetic trim around the chimney where it penetrates the wall at an angle. The component is available in 5 angle variations and supplied in two halves together with fixings. The cover rings are design to cover a range of angles as detailed below. Note: Due to the changing geometry some gaps are unavoidable when the required angle is at the extremes of the angle range.

Alle Bauteile auch in 178 mm und 203 mm Innendurchmesser lieferbar!

Floor Penetration Components

Combustible floors

For solid fuel applications where there is a risk of a chimney fire or where the flue gas temperatures can exceed 250°C but not greater than 450°C, the following penetration components must be used when passing through a floor or ceiling. Each ventilated component offers a 50mm distance to combustible materials. In all cases the 50mm clearance to combustible materials **MUST** be maintained throughout the installation.

Intumescent Sealant (0199900) is required for the correct installation of ventilated components, available on page 13.

Ventilated Ceiling Supports

These are used to both support and firestop the chimney system when it passes through the first combustible floor, directly above the appliance. The ventilation slots allow passive ventilation of the enclosure to prevent heat buildup.

D5 White Ventilated Ceiling Support Kit (T450)

The D5 offers a more aesthetically pleasing flat appearance to the Standard Ventilated Ceiling Support, while still incorporating an intumescent matrix for maximum fire safety. This component is finished in a high quality white gloss finish.

ø	A(mm)	B(mm)	Code
127mm	352	279	2188805
152mm	372	299	2188806

Standard Ventilated Ceiling Support Kit (T450)

Incorporates an Upper Ventilated Support Plate and Lower Firestop Assembly. The lower assembly also incorporates an intumescent matrix design which expands rapidly in the presence of fire and seals the ventilation slots to prevent smoke and potential spread of fire from the room below. Manufactured in bright annealed stainless steel, but also available painted black (add a ZB to the code), or white (add a ZW to the code).

ø	A(mm)	B(mm)	C(mm)	Code
127mm	361	281	379	2172705
152mm	381	301	399	2172706

Please refer to Page 16 for loadings.

SFLUE

Ventilated Firestop (T450)

Used where the chimney passes through the upper combustible floors, and where sections below the floor are enclosed within a non combustible shaft. This item is not load-bearing.

ø	A(mm)	B(mm)	Code
127mm	379	281	2188705
152mm	399	301	2188706

Non-Combustible floors

The following components can be used on gas or oil fired appliances, where the flue gas temperature does not exceed 250°C, and/or where the chimney passes through a non-combustible floor / enclosure. **In all cases the 50mm clearance to combustible materials MUST be maintained throughout the installation.**

Ceiling Support Kit

Provides a 50mm air gap clearance to a penetrated floor or ceiling and is only used when penetrating a non-combustible floor, and/or services a gas or oil fired appliance where the flue gas temperature does not exceed 250°C.

ø	A(mm)	B(mm)	Code
127mm	330	280	2102705
152mm	355	305	2102706

Firestop Spacer

Used where the chimney passes through the upper non-combustible floors, and where sections below the floor are enclosed within a non combustible shaft. This item is not load-bearing.

ø	A(mm)	B(mm)	Code
127mm	330	280	2108705
152mm	355	305	2108706

Dimensional Information

The information contained in these pages relates to additional dimensional and performance data to aid in the design of the system. In all cases, any design must be reviewed and ultimately installed in accordance with the separate product installation guide, as the sales brochure only provides limited information.

RESIDENTIAL

Vitreous Enamel

SVIT

Quick Installation

Brand Compatibility

No Sealant Required

Year Product Warranty

SVIT® is a vitreous enamel-coated steel connecting flue pipe designed to facilitate the connection between a multi-fuel appliance, an existing brick chimney or a prefabricated twin wall chimney system. It offers a smooth, aesthetically pleasing joint, without the need for additional locking bands or fire cement and is available in 100mm, 125mm, 150mm, 180mm & 200mm.

Flexible Liner

SELF FLEX

V2 Corrosion Resistant

P1 / N Rating

Brand Compatibility

Year Product Warranty

SELF FLEX® is a double skin multi-fuel flexible chimney liner suitable for multi-fuel, gas, and oil-fired applications up to a maximum flue gas temperature of 600°C. CE marked to EN 1856-2. The SELF FLEX® family range is suitable for the relining of masonry flues and used with wood, multi-fuel stoves and open fires and is available in three different specifications.

Insulated Flexible Liner

TUBEX PLUS

V2 Corrosion Resistant

Brand Compatibility

125-150mm Diameter

Product Warranty

TUBEX PLUS® is a unique insulated flexible liner for multi-fuel applications that allows maximum flexibility and ease of installation, the insulated core offers excellent thermal resistance to maximise natural draft to ensure optimum efficiency of the appliance with its 13mm high density insulation layer. Ideal for use on modern high-efficiency wood burning and multi-fuel appliance and application.

Single Wall / Connecting Flue

SIGMA

Quick Installation

Brand Compatibility

T600 Rating

Year Product Warranty

SIGMA® is a stainless-steel single wall connecting flue pipe for use with multi-fuel appliances, brick chimneys, twin wall systems and flexible liners. Available in four diameters 127mm, 152mm, 178mm and 203mm manufactured for wood and multi-fuel burning appliances it has a gas-tight joint that negates the need for fire cement or rope.

Twin Wall / Twist Lock

NOVA

Fire Rated EN1366-13

100-600mm Diameter

P1 / H1 Rating

Year Product Warranty

NOVA® insulated twin wall system, a superior, U.K designed, engineered and manufactured flue for quality domestic installations. With its uniquely robust multi barb speedy twist lock jointing system, it's trusted and favoured by installers around the globe. A wide range of components makes any installation a possibility.

COMMERCIAL

Single Wall / Push Fit

SUPRA

Quick Installation

T450 / 200 Rating

80-600mm Diameter

Multi-Fuel Appliances

Year Product Warranty

SUPRA PLUS® is a British built single wall chimney system designed specifically for today's modern high efficiency appliances that operate under positive pressure and condensing conditions.

Manufactured in 9 diameters ranging from 80mm to 350mm and consists of a range of lengths and fittings which simply push-fit together, and which are secured with a locking band and available with a wide range of support components that cater for both lateral and vertical structural loading of the product.

SUPRA XL® covers larger internal diameters, 400mm, 500mm & 600mm, that can be manufactured in either 1mm or 0.6mm 316L stainless & has the same features of Supra Plus; including factory fitted seals.

Twin Wall / Twist Lock

NOVA

Fire Rated EN1366-13

100-600mm Diameter

P1 / H1 Rating

Year Product Warranty

NOVA® is a pre-fabricated, factory-made twin-wall, insulated stainless steel chimney system. Suitable for condensing and positive pressure applications and is specifically designed to meet the demands of the latest high-efficiency heating appliances as well as traditional gas and oil-fired combustion equipment. With its unique multi-barb twist-lock jointing system.

Manufactured in 8 internal diameters, ranging from 100mm to 355mm and consists of a wide range of components, together with a strong 16-barb twistlock jointing system, NOVA offers the ultimate in ease of installation and functionality. With its strong joint design, NOVA can achieve a maximum unsupported height of 3.0 metres above the last support (2.0 m for DN100), without the need for structural locking bands.

NOVA XL® extends the internal diameter range by a further 5 sizes, 400mm, 450mm, 500mm, 550mm & 600mm.

Twin Wall / Flanged

EUROPA

Fire Rated EN1366-13

T600 Rating

100-1200mm Diameter

Year Product Warranty

The **EUROPA®** product family consists of 3 flanged twin wall systems to suit a multitude of applications & all are constructed (as standard) from a 316L Stainless inner, 304 stainless outer & 25mm of insulation. All configurations are suitable for continuous flue gas temperatures up to 600C (T600) and positive pressure applications of up to 5000 Pa. The product family is for use with appliances ranging from coffee roasting machines to backup generators.

EUROPA® is made up of a 1mm inner & supports a diameter range from 100mm through to 1200mm; and can be configured with either 50mm or 100mm of insulation. EUROPA® is fire rated to in accordance with BS 476-24.

EUROPA PLUS® is made up of a 0.6mm inner & supports a diameter range from 100mm to 600mm; and can be configured with either 50mm or 100mm of insulation. Its flange joints are sealed with the use of composite graphite gaskets and U bands that offer a robust long-lived service. EUROPA PLUS® is fire rated & tested to the latest fire resistance normative BS EN 1366-13.

EUROPA LITE® is made up of a 0.6mm inner & supports a diameter range from 100mm through to 600mm; and can be configured with either 50mm or 100mm of insulation. Utilising a mating flanged joint design with a location spigot for easy alignment during installation

About SFL

British manufacturer of flues & chimneys for residential & commercial applications for more than 50 years.

Commercial Solutions and Project Assistance

For large-scale installations in commercial buildings, we manufacture a range of flue systems with ease of install at the centre of your design. From complex header configurations to large-diameter stacks, we can accommodate almost every requirement for any application.

At SFL, we work with carefully selected installation partners to ensure your turnkey package is carried out on time within budget by seasoned professionals.

We're committed to offering industry-leading technical support services, throughout the whole process of design, manufacture, and supply of your upcoming project. Our experienced team are on hand to assist you at every stage of your project. From initial product selection to flue routing and calculations.

Residential Solutions

From wood burning & multi-fuel stoves to gas fires & oil boilers, our time-honoured brands of flues and chimneys have been a mainstay of domestic heating for decades. We work with a network of distribution partners providing high-quality residential flue and chimney components for easy installation. With fast delivery times and comprehensive product warranties, we ensure that your requirements are met with quality and reliability.

At the forefront of flue and chimney manufacturing and technology.

Since 1969 SFL have been leading the way in flue and chimney innovation and technology. Our portfolio of trusted chimney and flues brands are known throughout the world for their engineering excellence. We offer industry-leading technical support services throughout the whole process of design, manufacture, and supply for commercial, domestic, and industrial applications, with uncompromised customer service.

We are proud of our British built heritage at SFL. Our manufacturing centre is based in Barnstaple, Devon, UK, alongside our extensive R&D centre, ensuring continuous product development and testing to the latest Standards.

SFL is part of the Sphering group, Sphering is an EU market maker with renowned expertise in design, manufacturing and distribution of advanced air and flue care systems.

WeLab®

As a committed company determined to play an active role towards the environment and society, the Group has its own R&D centre: WeLab®. This facility has allowed the group to comply with the newest European standards (including the NZEB: nearly zero energy building) in terms of security and performance of appliances, but also to adopt a responsible innovation approach. With our WeLab®, we have developed test rigs based on minimum requirements in order to guarantee our clients the highest levels of security and performance.

SFL branded products are synonymous with the highest quality – it is this reputation that enables specifiers, contractors, and householders to use our products with total confidence.
